

PD50X/PD56X UL913 Intrinsic Safety DMR Radio

- UL Certified DMR radio
- Analog & Digital Dual Modes
- Compact design
- 2 time slots in DMO

Today, safety is the most important thing we are asking for in every aspect of life and work. Hytera understands the challenges in hazardous environments and is dedicated to designing and developing safer radios for more and more customers. Hytera believes it is rather urgent to provide an intrinsic safety radio to commercial market. Build a radio with the classic housing to provide a small and light product. Design a radio to pass UL913 certification for most dangerous areas with explosive gas and combustible dusts. Introduce a cost-effective radio with much more features for enterprises and commercial users.

In digital mode, PD5 UL913 Series operate upto 20 hours under a duty cycle of 5-5-90.

Rugged & Reliable

It is compliant with MIL-STD-810G standards & IP54.

One Touch Call/Text

Support One Touch features that comprise of Preprogrammed Text Messages, Voice Calls and Supplementary Features.

Supplementary Features (optional)

PD5 UL913 Series support radio enable, radio disable, and remote monitor, as well as priority interrupt.

Dual Mode (Analog & Digital)

Dual modes (analog & digital) operation ensures a smooth analog to digital migration.

Radio Registration Service

RRS allows PD5 working in Smart Dispatch and SmartOne Dispatch system, so that the dispatcher can check if the radio is on line or off line.

A&D Mixed Scan

PD5 supports to have analog channel and digital channels added in one scan list. This is much convenient for customers to have a smooth migration from analog radios to digital radios.

Secure Communication

Provide basic digital encryption and Scrambler feature in analog mode.

Advanced Signaling

Support multiple advanced analog signaling modes, including HDC1200, 2-Tone and 5-Tone, providing better integration into existing analog radio fleets.

Emergency Alarm

Emergency Alarm can be sent to other radios via one touch of programmable button, then establish an emergency call in a specific group. Make your response for big event more quickly.

Single-site XPT Trunking (optional)

PD5 UL913 supports working in Hytera XPT Trunking system, which is a cost-effect trunking system and provides dynamic assignment of voice and data service for a large number of subscribers.

Pseudo Trunk

This virtual trunking feature allocates a free timeslot for urgent communications. This effectively enhances frequency efficiency and allows you to communicate in a timely manner in emergency situations.

DMO True 2-Slot

In DMO Hytera can provide 2-slot communication, which allows for 2 talk paths on 1 frequency.

Target Markets

Manufacturing

Some flammable metal, mineral, or other dusts, existing in the factory's air, may give rise to explosion.

Chemical Industry

Flammable substances are converted and processed. These processes may give rise to explosive mixtures.

Food and feedstuffs industry

Explosive dusts may arise during transport and storage of grain, sugar, etc.

Refinery

The hydrocarbons handled in refineries are all flammable and, depending on their flash point, may give rise to explosive atmospheres.

Pharmaceutical industry

Alcohols are often used as solvents in the production of pharmaceuticals. Agents and auxiliary materials may give rise to dust explosions.

Firefighting

Fire environment often comes with strong smoke, flammable matter and high temperature.
